Mini & Micro RO Desalination Systems

About Online - Fair - Forum

1.000.000 m³/day capacity desalination plants are big industrials sides. The working horse in desalination are capacities of some 10 m³/d to 1.000 m³/day. This plants globally do cover the by fare the biggest number of all build and operated desalination plants.

This plants do secure water supply without being connected to public water networks. Mostly Hotels and also local industry are heavily based on such systems.

The event is concentrated on Mini & Micro Desalination Systems, its components, compact units, operation and maintenance on a global scale.

The simple and robust handling of such plants will be the key subject. Efficient Energy consumption has to be focused. The forum will have a close look at this area. Robustness and availability is the key in this business.

This forum is primarily aimed at representatives of hotels and tourism as well as small and medium sized enterprises. Also welcome are universities and staff of research centres and all those who want to acquire this special know-how.
